Examiner's Reasons for Allowance

The following is an examiner's statement of reasons for allowance: The claimed invention is free of the prior art of record because the prior art of record does not teach or fairly suggest a method of treating a bacterial infection comprising the administration of a CpG oligonucleotide, which oligonucleotide further comprises a stabilized backbone (e.g. phosphorothioate alkyl- or aryl-phosphonoate internucleotide linkages).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Examiner's Comments

The instant disclosure and claimed priority documents teach a method of treating a bacterial infection in a subject comprising the administration by various routes of a CpG-containing immunostimulatory oligonucleotide, whereby Il-6, Il-12 and interferon-gamma are induced in the subject, and natural killer cells are stimulated in the subject, and further whereby bacterial infections are treated. The instant disclosure and claimed priority documents also teach a wide array of CpG-containing immunostimulatory oligonucleotides, represented by the formula 5'X₁X₂CGX₃X₄3', wherein X₁X₂X₃X₄ are nucleotides and C is unmethylated.
